Your nannies, your families, one page.

GoGoBambino gives your agency one web page for every family you place nannies with: shifts, offers, forms and hours. Every family you link gets Premium.

Offer shifts in minutes

A family asks for care from their phone. You see which nannies are free, offer the shifts, and the nanny accepts in a tap.

Hours ready for payroll

Scheduled hours for the month, nanny by nanny and family by family, as a spreadsheet.

Premium for every family

While your plan is paid, every family you link has Premium for everyone in it, parents and nanny.

Forms signed in the app

Send your own risk assessment or consent form. The family signs on their phone and you keep the signed copy.

- **Nannies are never counted**
- **Works in any web browser**
- **Families keep their own record**

GETTING STARTED

1

Invite your team

Nannies join free and say when they are free.

2

Link your families

By email, or with your agency code.

3

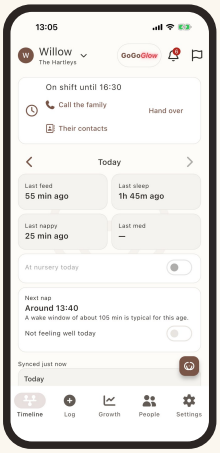

Offer the shifts

They land in every calendar, and stay in sync.

Pay for the families, not the nannies.

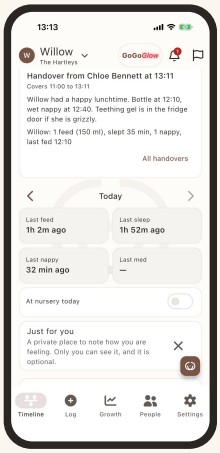

FAMILIES	A MONTH	PER FAMILY
Up to 10	**£49**	about £4.90
Up to 25	**£99**	about £3.96
Up to 50	**£179**	about £3.58
Up to 100	**£299**	about £2.99
More than 100	Priced to fit. Talk to us.	

Every plan includes your HQ, all your nannies, and Premium for every family you link. Pay monthly, or yearly with two months free. If a payment is late, families keep Premium for 7 days.

Your nannies get

Their shifts from every family in one app, the day so far when they walk in, one-tap handover, and their hours for the month. Free.

Your families get

The day as it happens, with who logged what, a handover at the end of each shift, and Premium while your plan is paid.

> HQ sees who is on shift and when. It never sees what was logged, a child, or a parent's details. Families can stop sharing at any time and keep their record.

Start with a few families.
