Every family you look after. One calm app.

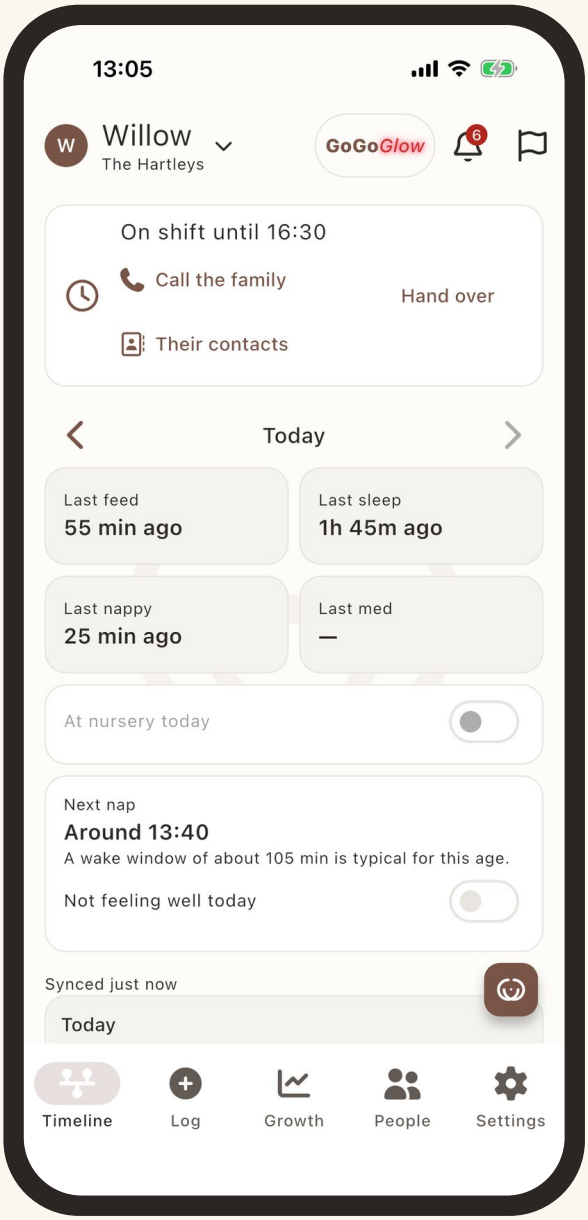

GoGoBambino keeps each family's baby log, your shifts and your hours together on your phone. It is free for you.

The day so far
Walk in and see the last feed, sleep and nappy, and the family's care notes, before your coat is off.

Log in a tap
Big buttons for feeds, sleep and nappies. Each entry shows your name, so nobody has to ask.

Works offline
No signal at the park? Log anyway. It catches up when you are back online.

Each family stays separate
Switch between families in a tap. A family never sees your other families, and only your agency sees when you are free.

- **Free for nannies**
- **iPhone and Android**
- **Every shift in your own calendar**

GETTING STARTED

1

Download the app
Choose “I’m a nanny or childminder”.

2

Join your families
By a family’s invite, or through your agency.

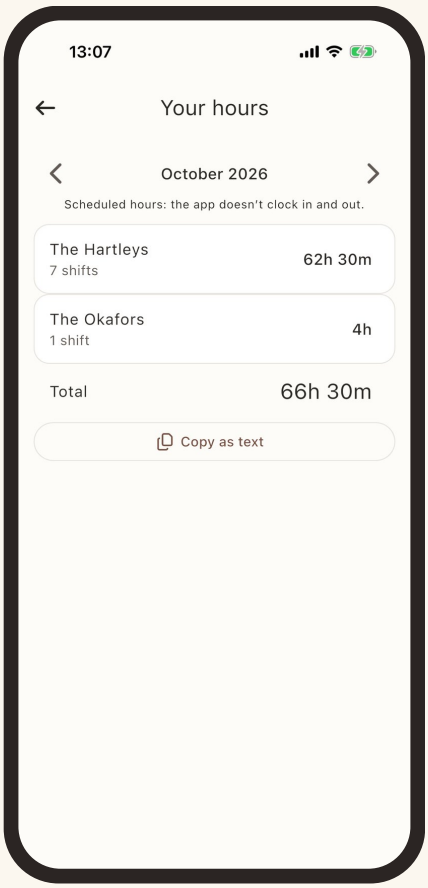

3

Your shifts arrive
Accept offers in a tap; they go in your calendar.

Hand over in a minute

Write a line at the end of the shift. What you logged is added for you, and the parents are told straight away.

Your hours, ready for payday

Scheduled hours for the month, family by family, with a total you can copy into an invoice.

> On shift you see the children you look after and the last 48 hours, so you know how the day has gone. Off shift, just the family’s name and your shift times. What you log stays with the family.

Free for nannies. Download it today.
